DETAILED ACTION

1. Claims 1-19 are pending.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. **Claims 1-19 are rejected under 35 U.S.C. 102(e) as being anticipated by Andersen, et al. (US 7,089,316).**

As per claim 1:

Andersen teaches a software application for login management residing on portable device which can be connected to a computerized terminal, said portable device include memory means, wherein said software application include:

means for password managing (**col.3, lines 51-65 and col.6, lines 27-46**), monitoring means for identifying login scenarios, interception means for identifying and recording new login data and (**col.6, lines 21-25 and 46-52**) means for providing login data to login challenges (**col.5, lines 38-50 and**

col.7, lines 16-35) based on prerecorded data stored on said portable device memory. **(col.10, lines 20-32)**

As per claim 2: See Andersen on col.4, lines 62-65; discussing a software application of claim 1 wherein the portable device further includes communication means for directly connecting to said terminal.

As per claim 3: See Andersen on col.11, lines 54; discussing the software application of claim 2 wherein said communication means is USB connection.

As per claim 4: See Andersen on col.5, lines 20-32 and col.10, lines 37-40; discussing a software application of claim 1 further including means for authenticating the user's identity to said software application.

As per claim 5: See Andersen col.4, lines 62-65; discussing a software application of claim 1 wherein said application is recorded on the portable device from a second memory means.

As per claim 6: See Andersen col.4, lines 62-65 and col.12, lines 18-35; discussing a software application of claim 1 wherein said application is downloaded to the portable device from an external network source.

As per claim 7: See Andersen on col.5, lines 12-17; discussing a software application of claim 1 wherein the password managing means includes interface means enabling the user to manage the login information.

As per claim 8: See Andersen on col.12, lines 30-35; discussing a software application of claim 1 further including a configuration file enabling automatic

activation of said software application.

As per claim 9: See Andersen on col.7, lines 5-15; discussing a software application of claim 1 wherein the login scenarios are identified by detecting existing and new running windows and identifying login challenge thereof.

As per claim 10: See Andersen on col.4, lines 62-65; discussing a software application of claim 1 wherein the software application is processed by the computerized terminal.

As per claim 11: See Andersen on col.12, lines 30-35; discussing a software application of claim 1 wherein the interception process is initiated and preformed automatically without requiring user interaction.

As per claim 12: See Andersen on col.12, lines 30-35; discussing a software application of claim 1 wherein for the operation of said software application no prior installation and no configuration changes on said computerized terminal are required.

As per claim 13: See Andersen on col.5, lines 3-11; discussing a software application of claim 1 wherein the software application supports using more than one user identity for the same destination system.

As per claim 14: See Andersen on col.7, lines 5-15 and col.12, lines 30-35; discussing a software application of claim 1 wherein the process of providing the login data is initiated and preformed automatically without requiring user interaction.

As per claim 15: See Andersen on col.11, lines 58-62 and col.12, lines 20-

35; discussing the software application of claim 1 wherein the user is enabled to select the login identity from said software for a login challenge from an automatically displayed user interface element.

As per claim 16: See Andersen on col.11, lines 58-62; discussing the software application of claim 15 wherein said selection is performed by a single click.

As per claim 17: See Andersen on col.7, lines 54-57; discussing the software application of claim 15 wherein said selection is performed positioning the mouse pointer and performing a single mouse double-click operation.

As per claim 18: See Andersen on col.11, lines 54-62 and col.12, lines 20-35; discussing the software application of claim 1 wherein said portable device is a USB flash memory device.

As per claim 19: See Andersen on col.11, lines 58-62; discussing the software application of claim 1 wherein the portable device is a memory device that can easily connect to said computerized terminal through an SD interface.
